IDEA

Decentralized casino built on Ethereum blockchain

The need for a fair gambling experience and our curiosity for the blockchain technology led us to the creation of Tyche.

Tyche offers a wide variety of games through its web platform and accepts payments only in Ether due to the fact that it is built on Ethereum network, thus it inherits all of its features.

WE ARE DIFFERENT.

PRIVACY

No need to provide any personal details to use our platform.

SECURITY

No hidden charges, you pay only what you consent.
Your funds stay yours.

FAIR ODDS

All game rules are completely transparent and immutable, making use of open source smart-contracts.

QUICK TXNs

Reliable and fixed transaction time guaranteed by the Ethereum Network.

Blockchains

Blockchain technology allows for safe and decentralized data storage based on cryptography

Smart contracts

Smart contracts are simply programs stored on a blockchain that run when predetermined conditions are met, thus the execution of an agreement is automated.

THE ONLY REQUIREMENTS

HUSTLE FREE GAMBLING EXPERIENCE

1

CREATE A WALLET

All you need is a
cryptocurrency wallet and
Metamask extension in your
browser

2

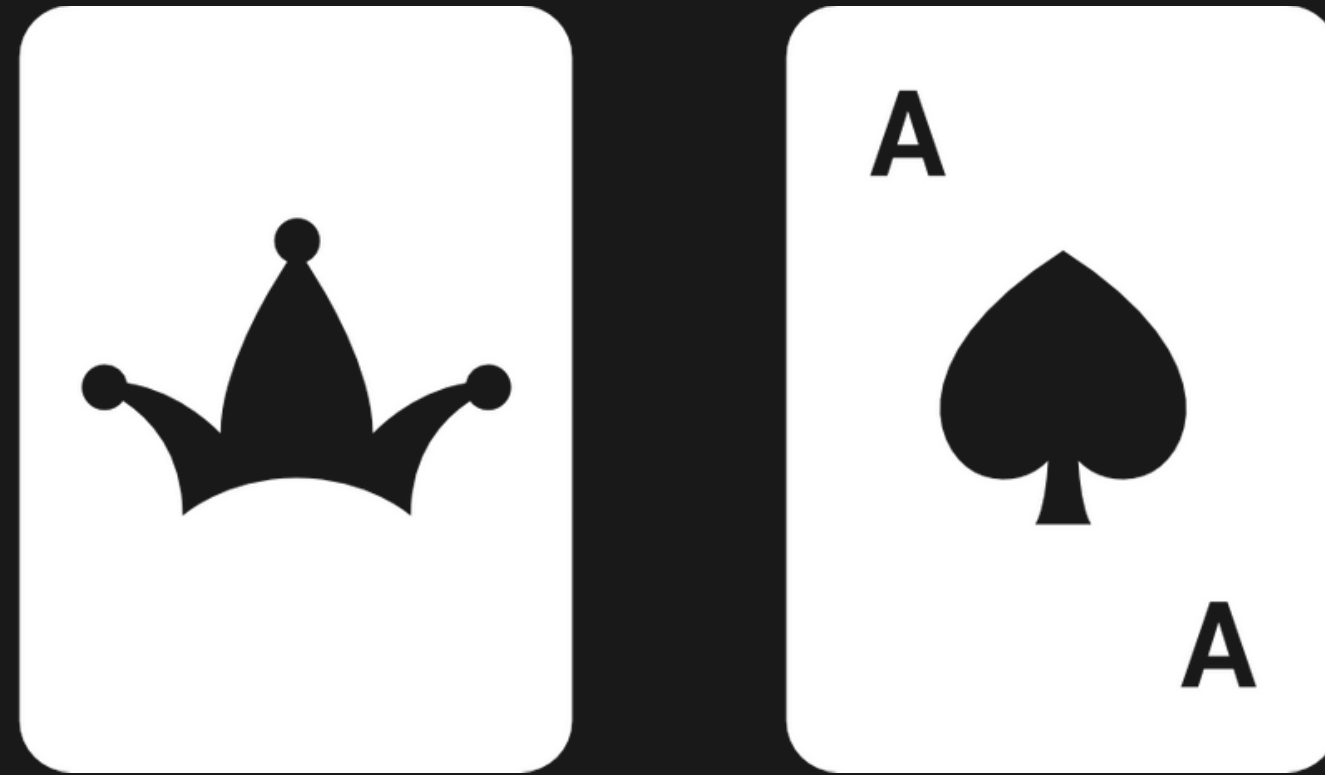

TRANSFER CRYPTO

Fund your wallet from an
